

Prompts Used for fit.ai

1. Role: You are a world class researcher

Context: I am trying to build an app which provides a custom made workout plan to people and helps them stick to the schedule. For this I need to understand the behavior of people to find reasons for issues like starting a routine, keeping up with the routine, able to achieve the goal etc. The is going to help the user end to end ie from starting the routine to achieving the final goal.

Output: You need to breakdown the journey into several headings and identify issues faced by people under each heading. This should be based on credible sources and research papers.

Instructions: Recheck the sources

Formulate the data again

Format -

1. Excel based dashboard (powerBI) like output
2. List of all the links you referred to

2.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Output: I want a list of all the user pain points extracted out of the excel file. The pains points need to be weighed against severity and product potential. The final goal is to find MVP.

Instructions: Double check the output and ensure that it is based on the file only. Remove all hallucinations. Tag any assumptions made.

3.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

1. I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: Find me the different target segments and the most helpable and most profitable segment.

Output: Make a dashboard or the Same

Instructions: Make sure to find and use only trustable sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Link the studies used to make the conclusions

Format:

1. A dashboard having text and visual elements to help understand better
2. Purely Text based. Will be used to put in a word file

3. Product Idea Overview

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write Product Idea Overview that includes

1. Product Name
2. Product Context
3. Target User Segment
4. One-line Product Description

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

4. Product Discovery

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

1. I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write Problem Discovery which includes -

1. User Problem Statement
2. Why this Problem matters
3. Current alternatives or workarounds users may be using
4. Why Existing solutions may not be enough

Output: Make a dashboard for the Same and a word file

Instructions: Make sure to find and use only trustable sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Link the studies used to make the conclusions

Take references from the docs attached

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

5. Target User Segment

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

1. I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write Target User Segment which includes -

1. Who are the Users?
2. What are their goals?
3. What Challenges do they face?
4. What motivates them to use this product?

Output: Based on the source files extract answers to the given questions.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

6.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

- 1.
2. I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to 2 User Personas which includes -

- 1.
2. Name
3. Age or Profile
4. Background
5. Goals
6. Pain Points
7. Current Behavior

8. What they expect from the product

Output: Based on the source files extract answers to the given questions.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Purely Text based

7.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this I have a detailed excel document.

Task: You are to create 2 User Personas which includes -

1.Name

2.Age or Profile

3.Background

4.Goals

5.Pain Points

6.Current Behavior

7.What they expect from the product

Output: Based on the source files extract answers to the given questions.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Create a user persona flash card with an AI generated picture and all the answers in a grid format

8.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to create User Research Insights which includes -

1. 5 assumed user interview insights or observations
2. Key pain points derived from those insights
3. How these insights influence your product direction

Output: Based on the source files extract answers to the given questions.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based output

9.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and

making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to perform a feature prioritization using RICE framework -

Output: Based on the source files extract answers to the given questions.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Table with mandatory columns

1. Feature Name
2. Priority Score/Category
3. Reason for Priority

10.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write a clear product vision statement

Output: The vision should explain what the product aims to become and why it matters.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss
Run the prompt twice for accuracy
Format:
Text based

11.

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the value proposition that includes

- 1.
2. What value the product provides
3. Who it provides value to
4. Why it is better or more useful than current alternatives

Output: The vision should explain what the product aims to become and why it matters.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

12. MVP Scope

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the value proposition that includes

- 1.
2. What value the product provides
3. Who it provides value to
4. Why it is better or more useful than current alternatives

Output: The vision should explain what the product aims to become and why it matters.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

13. JTBD statement

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write JOBS-TO-BE-DONE statement

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in the following format

When I am _____,
I want to _____,
so that I can _____.

14. Product objective

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the main objective of the MVP

Output: The main objective of the MVP

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

15. Problem and Goal

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the Problem and goal that includes

- 1.
2. Problem being solved
3. User Goal
4. Business Goal
5. Product Goal

Output: The Problem and goal

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

16. User Stories

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the 5 user stories in the prescribed format

Output: User stories

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in the given format

As a ,
I want to ,
so that I can .

17. Acceptance Criteria

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write the acceptance criteria for each of the user stories in the prescribed format

Output: User stories

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in the following format

Given - When - Then

18. Functional Requirements

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and

making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to list all the functional requirements ie what the product must do

Output: Functional Requirements

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

19. Assumptions

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to list all the key assumptions being made

Output: Assumptions

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

20. Dependencies

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to list all the dependencies

Output: Dependencies

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

21. Risks

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to list all the Risks

Output: Risks

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

22. Agile Backlog

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to create a simple backlog with

1. 1 Epic
2. 5 user stories
3. Priority
4. Estimated effort or story points

Output: Agile Backlog

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Answers should be in a table format with columns:

1. Epic
2. User Story
3. Priority
4. Story Points
5. Notes

23. AI Feature Overview

Role: You are a world class product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This

will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write AI feature overview which includes

1. What the AI feature does
2. Where it appears in the user journey
3. Why AI is useful for this problem

Output: AI feature overview

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

24. Type of AI Capability Used

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write which type of AI capability your product uses

Output: Type of AI capabilities used

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

25. AI Input and Output

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write Input Output table of the product

Output: input and output

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in a table format with columns

1. Input given to AI
2. AI processing/Logic
3. Output shown to user

26. AI Workflow

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to explain the AI workflow step by step

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

27. Data Used

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to mention all the data AI system may use

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

28. Possible AI Failure Cases

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This

will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to mention all the possible AI failure cases

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

29. Responsible AI Cases

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to mention all the Responsible AI risks to cover the following areas

- 1.
2. Privacy Risk
3. Bias or fairness risk
4. Hallucination risk
5. Safety risk
6. User trust risk
7. Overdependence on AI

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

30. Guardrails and Mitigations

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to mention all the Guardrails for each major risk and suggest a practical mitigation

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in a table format with columns

1. Risk

2. Possible impact

3. Mitigation/Guardrail

31. AI Transparency

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This

will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to explain how users will know that they are interactive with AI.

Mention

1. AI labels or disclaimers
2. Confidence indicators, if applicable
3. User feedback options
4. Escalation to human support, if applicable

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

32. North Star Metric

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to write one North Star Metric and explain

- 1.
2. Why this metric matters
3. How it connects to user value
4. How it connects to business value

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

33. Supporting KPIs

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You are to define 6 supporting KPIs

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in a table with columns

1. Metric
2. What it measures
3. Why it Matters

34. AARRR

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This

will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to map the product to the AARRR funnel. If any stage is not relevant explain.

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in a table with columns

1. Funnel Stage - Rows - Acquisition, Activation, Retention, Revenue, Referral
2. User Action
3. Metric

35. A/B test

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to design one A/B test which includes:

- 1.
2. Hypothesis
3. Control Version
4. Target version
5. Target Users
6. Primary Success metric

7. Secondary Metrics
8. Success Criteria

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

36. Dashboard Plan

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to design a simple dashboard plan

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document in a table with columns

- 1.
2. Dashboard Action
3. Metrics Shown
4. User of Dashboard
5. Frequency of Review

37. GTM Strategy

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to create a basic Go-to-Market plan which includes

1. Target Audience
2. Positioning statement
3. Launch channels
4. Key message
5. Launch checklist

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

38. Pricing or Monetisation

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to create a pricing or monetisation model for example: free, premium, subscription, usage-based pricing, enterprise pricing etc.

Also explain why your pricing model fits the product

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

39. Pricing or monetisation

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to create a pricing or monetisation model for example: free, premium, subscription, usage-based pricing, enterprise pricing etc.

Also explain why your pricing model fits the product

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

40. Post-Launch Feedback Plan

Role: You are a world class AI product strategist.

Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far -

I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document.

Task: You need to create post launch feedback plan and explain how you will collect feedback after launch

1. feedback channels
2. What feedback will be collected
3. How feedback will influence future iterations

Also explain why your pricing model fits the product

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format:

Text based answers to each of the questions with headings and subheadings. ensure the output is formatted and ready to be pasted in final document

41. User Flow

Role: You are a world class AI product strategist. Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding. Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document. Task: you need to create a simple user flow showing the journey of a user. Instructions: Make use of the source files Fill in any missing components in the logic from well researched sources Go through the prompt again and not miss Run the prompt twice for accuracy Format: flow diagram. Break the diagram down into different heads to be put in a document

42. Wireframe

Role: You are a world class AI product strategist. Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to

maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding. Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed excel document. Task: you need to create a wireframe diagrams for each of the components which includes

1. Onboarding Flow
2. First Workout Flow
3. Daily Engagement Loop
4. Progress and Rewards
5. Retention and Adaptation

Instructions: Make use of the source files Fill in any missing components in the logic from well researched sources Go through the prompt again and not miss Run the prompt twice for accuracy Format: wireframe. Break the diagram down into different heads to be put in a document

43. UX Design Explanation

Role: You are a world class AI product strategist. Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding. Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed pdf docs including one about wireframe designs and user flows, it also includes prototype for the same

Task: you need write a UX explanation explaining the following

1. Why you designed the flow this way
2. How the design makes the product easy to use
3. How the design builds trust in AI output
4. What privacy, safety, for feedback elements are shown in the interface

Instructions: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format: Text based answers to each of the questions with headings and subheadings.
ensure the output is formatted and ready to be pasted in final document

44. AI tool Appendix

Role: You are a world class AI product strategist. Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding. Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed pdf docs including one about wireframe designs and user flows, it also includes prototype for the same

Task: you need to document all the AI tools used to form the Project.

Write for each of the usage in:

1. Market Research

2.Competitor research

3.Persona creation

4.Prompt engineering

5.PRD drafting

6.Feature ideation

7.Wireframe ideation metric brain storming

Instructions: Make use of the source files I have included the prompts document also

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

Format: Text based answers to each of the questions with headings and subheadings.
ensure the output is formatted and ready to be pasted in final document in a table
format with following columns

1.Tool used

2.Purpose

3.Prompt used

4.How you reviewed or modified the output

45. Prototype (Loveable)

Role: You are the best full stack AI developer

Context: Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few

minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed pdf docs including one about wireframe designs and user flows, it also includes prototype for the same

Task: You are to build a working mobile app prototype that could be run on browser to test it out

Instruction: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

This is going to be posted in GitHub as a personal project

46. Icon Generation

Role: You are the best full stack AI developer

Context: Context: I am building an app fit.ai, that makes custom workout plan for people and helps them stick to it. Point is to maintain consistency even if for a few minutes. This will desensitize people from the mindset of sticking to a hard and fast schedule and making progress even if for a few minutes. It will help people realize the effect of compounding.

Following progress has been made so far - I have made a detailed study on what are the pain points and the dropout rates in the fitness journey. This is based on publicly available journals, studies etc. - for this i have a detailed pdf docs including one about wireframe designs and user flows, it also includes prototype for the same

Task: You are to build a mobile app icon

Instruction: Make use of the source files

Fill in any missing components in the logic from well researched sources

Go through the prompt again and not miss

Run the prompt twice for accuracy

This is going to be posted in GitHub as a personal project
